

ANNOUNCEMENT SERVICE 1 — INFORMATION

TRUCKinform

...the pan-European platform for truck parking

Information service now available — for free!

Dispatchers and truck drivers can now get comprehensive truck parking information for all of Europe (40 countries), from one single source — so as to help plan your journey. This services is free from www.truckinform.eu. And truck park area operators can accurately advertise their facilities.

Truckinform is one single platform containing a unified, detailed, and up-to-date inventory of European truck areas. It comprises the following three services:

1. **Information** about 2'500 truck parking areas in 40 European countries.
2. **Availability/guidance**, where users will be directed to the next available and appropriate truck parking place (available soon!)
3. **Reservation**, where it becomes possible to book a truck parking space in advance.

Drivers/dispatchers: it is very easy to search for truck parking information

Truck parking information can be retrieved using search criteria by both location and specifiable truck-parking attributes — including predefined user preferences — and results can be shown on a map or as a table.

For example one could request:

- truck parking places along a specified route, like from Strasbourg going to Stuttgart
- truck parking according to location and features, like in all of Poland that both have showers and are secure.

Truckstop operators: register now to edit and improve your data

Truckinform offers you the possibility to accurately and comprehensively show your facilities to Europe's estimated 2.5 million long distance truck drivers and half a million dispatchers.

Please contact us at support@truckinform.com, or by fax at +41-44 286 66 30, and tell us who you are. We will then provide you with more information on how you can look at your portrait and improve on it.
